

Method for controlling or regulating printer

Patent Number: DE4401536
Publication date: 1995-07-27
Inventor(s): KIRCHHOFF STEPHAN (DE); MARSCHAR JUERGEN (DE); PFEIFFER NIKOLAUS (DE)
Applicant(s): HEIDELBERGER DRUCKMASCH AG (DE)
Requested Patent: ☐ DE4401536
Application Number: DE19944401536 19940120
Priority Number(s): DE19944401536 19940120
IPC Classification: B41F33/16; B65H43/00; B41F33/10
EC Classification: B41F33/00A
Equivalents:

Abstract

The method controls or regulates the setting up operation for a printer. It involves inputting an operating parameter according to the setting of another operating parameter. The computer control system uses varying parameters according to a reference printer. The values for parameters lying outside the limits of the reference machine parameters are derived using a numerical successive approximation method or by interpolation. Values are displayed on an interactive user display.
